Aspects of Your Life

Everybody is engaged in social roles that change over time. For example, a woman's role as mother of pre-school children involves activities, responsibilities, and relationships that are different from those she has as mother of adolescents. Similarly, changes occur in one's role as marital partner, in one's occupational career, or in the course of one's participation in volunteer political or social activity, or the practice of an art or craft. Most people are engaged in more than one of these role sequences. The roles interact with each other, and the amount of time and energy involved in any particular role changes over time.

In the space below, please plot the level of involvement that you have felt, or anticipate in the near future, in the main roles of your life. By "involvement" we mean expenditure of time and interest. If you have had more than four of these on-going roles, choose the four most important. If you have had fewer than four, leave graphs empty as needed.

Please be sure to label clearly what each role is.

Role #1: _____

Role #2: _____

Role #3: _____

Role #4: _____

Please comment on the ways these role sequences have intertwined in your life.

For two or three of the roles that you have graphed please consider this set of questions:

In the early stages of this role, did you have a dream or idea about what it would be like or what you wanted to accomplish? If so, was this strong, weak, clear, vague, emotional, rational? (Please describe it as best you can).

Was there someone who served to aid or inspire you, or to serve as a model or guide? If so, who were these individuals (in relation to you)? What were they like, and how did you feel towards them?

Households differ in the environments they provide. Some have a strong cohesiveness -- members are expected to do a lot of things together and to be mutually supportive. In some there is a lot of interaction among members -- they talk to each other a lot. In some there is a lot of conflict -- interactions are generally irritated, or openly angry or aggressive. Some show a high degree of organization; here rules and responsibilities are clear and explicit. Some have a marked hierarchy of authority.

Chapters of Your Life

Imagine that you are preparing the outline for an autobiography of your life. Arrange your life into "chapters", starting at as early an age as possible. Group years that seem to go together, and give each "chapter" a title. To keep this undertaking within limits, you may want to deal briefly with chapters that seem relatively uneventful, but answer questions such as the following for each chapter:

What were the significant things that happened during these years? What was significant about them? What were the images, issues, or themes of these years for you? Were there characters or motifs of stories, books, films, etc., that capture your feelings at this time?

How did you feel during this period -- about yourself, about others around you, in general?

What made this period end?

What did you want most? How much did you achieve of what you wanted?

After the title of each chapter, remember to tell what years the chapter covers.
